Queensland Manufacturers Sustainability Benchmark Assessment

How sustainable is your business?

Want help identifying opportunities for your business?

Claim your subsidised

Sustainability Benchmark Assessment

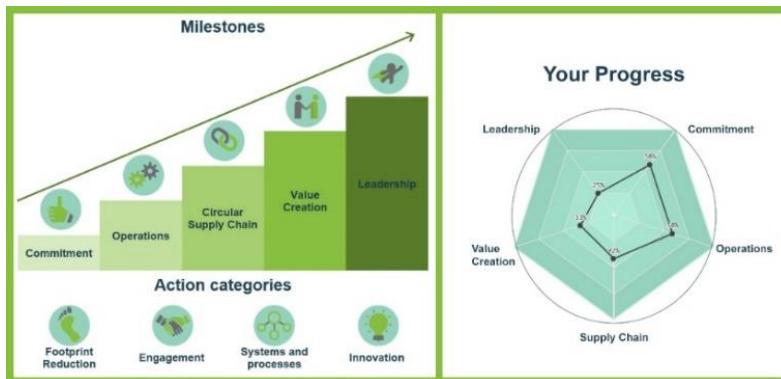

Option 1: Self-paced Sustainability Benchmark Assessment

Understand your position on your sustainability journey and receive a tailored Action Plan to help you take the next step.

Complete your online **Business Sustainability Assessment** to see a snapshot of your business's sustainability progress in the five key milestones of:

- ✓ Commitment to being sustainable
- ✓ Operating efficiently
- ✓ Being part of environmentally and socially responsible supply chains
- ✓ Creating value in products or service through sustainability
- ✓ Being a sustainability leader

Your assessment results and a customised action plan with recommendations will be immediately generated online and emailed to you. This action plan can then be used as the basis for a long-term strategic Sustainability Plan. You can re-assess your business within the first 12 months for free!

"The assessment is great! It accurately identified our weaknesses very quickly. I think it could be used throughout a wide range of businesses. I'd happily recommend it." Suzanne, Architect, Brisbane

Queensland Manufacturers Sustainability Benchmark Assessment

Option 2: Site-based Sustainability Benchmark Assessment

Receive expert help to benchmark your business's resource use, waste and carbon emissions and develop a detailed action plan to reduce costs and your environmental footprint.

The Ecoefficiency Group will work with you to build on the findings of the online Business Sustainability Assessment Tool and Action Plan to develop a Strategic Sustainability Plan. TEG will provide a customised benchmarking report that includes:

- ✓ Monthly trends of costs, resource use and waste generation
- ✓ Meaningful production or service KPIs
- ✓ Comparison of your business's KPIs with national and international benchmarks where available for your industry
- ✓ Scope 1 and 2 carbon footprint
- ✓ Efficiency opportunities encompassing energy, water and waste and provide a report which will follow the principles of a Level 1 AS3598 Energy Audit.¹
- ✓ No-cost/ low-cost measures and potential capital improvements for further investigation. ¹

Leading manufacturers reap the benefits of sustainability benchmarking - financially, reputationally and socially. Let us help you:

- ✓ Track progress and cut costs by reducing energy, water, waste and carbon emissions
- ✓ Reduce your footprint
- ✓ Compare with industry best practice
- ✓ Set achievable targets
- ✓ Engage with your staff, supply chain and customers
- ✓ Reduce risk
- ✓ Show sustainability leadership and inspire others
- ✓ Use sustainability to value add
- ✓ Tap into new markets

* Price include GST. Companies approved by the Queensland Government are eligible for a 50% subsidy. Option 2 is \$3,190 for businesses with less than 100 employees and \$4,290 for businesses with greater than 100 employees. [Valid until 31 January 2023]

Note: Our Advisors and the Business Sustainability Assessment Tool and reports from this program provide targeted advice based on your input. This is not financial product advice. Before implementing any action, we recommend you consult your licenced financial advisor. ¹The report will provide indicative or typical savings calculated using rules of thumb or industry acceptable benchmarks with indicative costs to provide a simple payback where possible i.e. a broad estimate level and base for further investigation. Where there is sufficient data and sub-metering, the report will include a simple breakdown of resource use and waste generation areas.
